

THE ROLE OF MANUAL LABOR IN THE DEVELOPMENT OF SMALL BUSINESS

Akhmedova Nasibakhan Hasanovna
Ferghana state university teacher

Market of relations development work release market requirements within organize to be done and different of networks mutually proportionate in touch to be depend Market rules work release specialization take come , different property to the forms based on economy host of subjects consumers from demand come came out without economic of activity to himself special aspects formation take will come . This is the process economy level and free economic activity for created to conditions suitable respectively changed goes

In particular , " Nortel" corporation employees almost 20 percent or 4 thousand person homemakers from labor uses Labor organize of doing this appearance only one year inside in the corporation productivity by 24 percent increase enable gives , housekeepers from labor from use came pure savings quantity average each one 10 thousand per household from the dollar the coat organize did AyBiEm of the corporation in Kentucky branch home work apply because of on rent work release fields save himself 400 thousand per year the dollar organize does Europe commodity work manufacturers is also similar in examples to bring can For example , the German " Salamandr" concern (half factory and raw "Hand make" from the material named leg clothes in hand betting) and etc. South-East asia in countries hand of the cocktail village economy products work release and again work shape wide spread House of labor wide prevalence and importance International Labor 1996 year of organization acceptance No. 177 " House work about". special Convention reflection reached House work concept content , worker homemakers have to be necessary minimal social that is guarantees set given

In the Republic done being increased socio-economic reforms in the context of home of labor main features of the following consists of :

1. Enterprise and homemaker employee between work to the contract based on sure and understandable legal relationships installation .
2. Hand cocktail enterprise and homemaker between mutually obligation and to responsibility based on organize to be done
3. Enterprise with to the contract according to hand cocktail with engaged in employee in the law in the eye caught all social from guarantees use
4. Hand work organize doing to businesses , this of labor high social importance account taking benefits and preferences to be given
5. Hand cocktail development economic and social to the goal compliance from the principle of come out done increase

Ours hand of the cocktail economic and social its importance small of entrepreneurship type as entrepreneurship activities in development place citizens and the work givers between mutually beneficial economic cooperation and cooperative connections through evaluation can in Uzbekistan done being increased of reforms foundation valid market of the economy support from the points one has been small of entrepreneurship development with closely depends . Because in the economy structural changes process work release of the composition known level ratio cause emits and economy in subjects compact economic activity type to choose from in the market to changes in response speed with own activities organize to do inclination forming goes Small of entrepreneurship socio-economic essence and by nature come came out without small entrepreneurship , first of all small entrepreneurship in the composition his specialty structure , secondly proprietary status and of labor character , thirdly organizational-legal forms , fourth , field and to the network affiliation , and finally from the fifth which to the market to work

depends is small entrepreneurship subjects to the above based on without grouping to the goal is appropriate .

That's it according to small entrepreneurship the following aspects relatively differentiate can Next in years in our country small entrepreneurship development about one series affairs done increased :

- wholesale and retail trade system reform being done ;
- small entrepreneurship to enterprises infrastructure departments by service of showing efficient system is being created ;
- small entrepreneurship of subjects legal rights and interests protection to do and entrepreneurship freedom to guarantee system forming ;
- entrepreneurs state to the list get and account to put eased order current done ;
- statistics and tax of the report shortened shape entered ;
- small entrepreneurship of subjects external economic activity freed ;

Research to the results based on brought theoretical conclusions with together the following practical offer and recommendations to bring can

➤ Small entrepreneurship subjects relatively less in quantity capital deposits at the expense of local material and work resources wide scale is used . But in Uzbekistan of the state big work release development financing ability low , economy of monopolization relatively high and internal of the market local goods with complete not provided such as problems they are with monopoly work producers and foreign entrepreneurship subjects between competition environment development Demand is enough

➤ Small entrepreneurship subjects technologies , products and services work release regarding the news quickly acceptance to do and to them suitable respectively work release reach about advantages ownership in consideration take , central and local power organs special funds organize reach and small entrepreneurship subjects in the middle tenders organize reach through free of charge modern technique and to technology based on small work release organize that they can encouraging to go to the goal is appropriate .
