

**EDUCATIONAL REFORMS IN UZBEKISTAN AND THE CONDITIONS CREATED
FOR YOUTH**

Nasrullaeva Nigora Ravshanovna

International Innovation University, II stage student

Abstract: This article talks about the updates, changes, reforms implemented in the field of education in Uzbekistan. Also, information on the priority tasks of forming modern, intellectual potential, competitive personnel is analyzed.

Key words: Education, quality, efficiency, innovation, reform, renewal, change, decision, decree, concept, program, artificial intelligence, engineering.

Systematic work on improving the quality and efficiency of education is being carried out in Uzbekistan in the following years.

These include a number of changes aimed at radical reform of the industry, adopted legal and regulatory documents.

The concept of the development of the public education system of the Republic of Uzbekistan until 2030, adopted on April 29, 2019, defines the following priority goals and tasks.

By 2030, Uzbekistan will be among the first 30 advanced countries in the world according to the PISA (The Program for International Student Assessment) rating of the international program for assessing the educational achievements of students;

- qualitative updating of the content of the continuing education system, as well as training, retraining and upgrading of professional personnel;
- improving the teaching methodology, gradually applying the principles of individualization to the educational process;
- introduction of modern information and communication technologies and innovative projects in the field of public education;

- strengthening the material and technical base of public education institutions and increasing the effectiveness of providing funds from the budget;

- introducing modern methods and directions of extracurricular education in educating young people and ensuring their employment;

- expanding the competitive environment in the state education system due to the development of public-private partnership;

- implementation of 5 initiatives, including complex measures aimed at creating additional conditions for youth education;

- in order to increase the attractiveness of working in the public education system, such as gradually increasing the level of remuneration, material incentives and social protection for the employees of general secondary educational institutions.

Of course, the implementation of accepted legal and regulatory documents, the creation of opportunities and conditions for the development of the industry, and the establishment of international cooperation relations are giving their results.

In his speeches, the President of our country stated that "the main pillar of the new Uzbekistan will be knowledge, education and training." Implementation of at least 50 joint study programs and the "double degree system" in cooperation with the world's top 500 foreign universities, 500 talented young people per year in bio-technology, artificial intelligence and other high-tech fields will be sent to study at the most prestigious foreign universities at the expense of the state. 200 million dollars will be allocated for

In our country, changes and updates related to providing quality education, training of highly qualified personnel, especially the sustainable development of the higher education system until 2030 are being implemented step by step.

On June 20, 2024, President Shavkat Mirziyoyev visited the "Inno" innovative educational and production technology park in Almazor district of our capital. This technological park was established three years ago, where innovative ideas and inventions are developed for the development of industrial sectors, cooperation with higher educational institutions is established to train young people in modern professions, seminars and practical trainings are organized with the participation of about 15 thousand students every year. was talked about.

There was a presentation of higher engineering schools under Tashkent State Technical University, Bukhara Institute of Engineering and Technology, Tashkent State Transport University, Fergana Polytechnic Institute, Tashkent University of Architecture and Construction and Tashkent University of Information Technologies.

Industry, energy and information technologies are developing, and new complexes are being launched. It was mentioned in the President's speech that engineers and technicians with modern knowledge and skills are needed for them.

The fate of the country, factors of its stable development depend to a large extent on intellectual, talented, intellectually mature young personnel. In this regard, it is first of all important to form a modern worldview in young people, develop education and training, and educate competitive personnel.

The establishment of a democratic legal state and a civil society depends on the extent to which young people, who are the owners of our future, fully acquire modern knowledge, the formation of socio-political and ideological immunity against various destructive ideas, and of course, the formation of feelings of responsibility and belonging. Because, in the current era of globalization, awareness and working in mutual cooperation for the interests of the whole state has become the demand of the time.

In conclusion, it can be noted that the large-scale reforms implemented in the educational process at the initiative of President Shavkat Mirziyoyev, the modernization of the material and technical base of educational institutions and the special decisions and decrees regarding the acquisition of information technologies and foreign languages as one of the important factors of the formation of the modern spiritual image of our youth, the government implementation of programs is noteworthy. Mastering information technologies and learning foreign languages is especially important for a modern person to strengthen ideological immunity, to fight against various destructive ideas, to make proper and effective use of the achievements offered by globalization.
