Key words: small business, poverty, entrepreneurship, vacant jobs.

The world scale personal of businesses place big , that's it because of need too demand too people between from day to day sharp is developing . In particular Uzbekistan in the Republic very a lot affairs and decisions work being released to this obvious is evidence . from this besides , the President to the decision according to " Village construction bank " commerce bank next to new " Business development bank " and his in the presence of " small business development collective responsibility limited society organize to be done our compatriots for new field for again one news it has been . September 4 on " Uzbekistan Republic of the president entrepreneurs with 2023 open communication defined tasks done increase measures about " the president decision [PQ - 292] acceptance done This about Justice ministry message did Decision with " Village construction bank " shareholding commerce bank basically Business development bank and his in the presence of the following organize done : " Small business development collective responsibility limited society ; 14 in the regions small to business support centers . Family entrepreneurship programs within Business development bank by small business projects for up to 7 years in deadlines loans is separated . Positive credit and tax to history have to entrepreneurs pledge demand for 50 percent is reduced . . To the decision According to the industry in the fields of " 140 advanced industry enterprise " program done is increased . That's it according to this to the program included of workers projects financing for foreign in currency 4 percent per annum , national in currency 10 percent per annum 10 years at the rate until the deadline credit funds is separated . ¹ of the event last in the section " Now in Uzbekistan a new bank appears will be He is only that's it direction with " , he said state leader Har one person his own interests of consumers demand and desires from within come out small business plans work get out , fast on occasion done by increasing in the country and even the world to the market take exit own to the front goal by doing puts

In our country small to business has been attention last in years It is not a secret that it is growing from the first years of independence from our 1st president one how much affairs done increase , to entrepreneurs initial knowledge to take over directed remedy events seen , state account using assisted . Independence years in our country entrepreneurship environment more improve , small business and private entrepreneurship fast to develop directed purposeful programs consistent done increased is coming . This purposeful state programs effect today's in the day our country gross internal in the product small business and private of entrepreneurship share is 53.9 percent in that own on the contrary finds This the indicator in 2000 was 31.0 percent in 2010 and 52.5 percent organize that he did telling transition to the goal according to²

Current to the day come , people between becoming popular going small business types marriage of style getting better and unemployed number to decrease help to give clearly Country economy for of the population to live style , financial situation , and possibilities important factor is considered Therefore , every one state economy stable for first of all , " poverty " . sharp reduction , unemployed layer known one work to occupy with attention focused , developed there are also few countries provided , help needs to families help to give in order to small business developed , empty work places increase goal by doing puts and different remedy events sees

" Poverty " is said the term near to the day until important not counted . In the last 10 years while this indicator to shorten directed national programs work released An example as , in cities from 2018 population to entrepreneurship attraction to do and " Har one the family is an entrepreneur food current done

Small business development own rules , ways existence , here of these using business long term by doing organization to the goal is appropriate . malasan , one enterprise how much to the population empty work place by creating to give , product work to issue need to be groceries from where taken , consumers of the people which layer entrance and that's it etc about thinking seeing planning need Har one work thorough to plans based on , strong attention attention with to be carried out , taken going simple small business and life long to the people long years service to do the ground creates
