

**EXPRESSION OF METAPHOR IN POETIC TEXTS**

**Akhmadaliyeva Odina**

FSU graduate student

**Sh. Iskandarov**

prof. scientific leader

**Abstract:** In the article poetic in the texts of metaphors application and metaphorical of displacements characteristics of metaphors types and expression statement done.

**Key words:** Metaphor, meaning, moving, shapely, similarity, feature, sign, o' similarity.

Society progressive reach with speech derivative meaning no \_ temporarily expressiveness concept with constant relationship occupation reach, go - go stabilized goes and derivative speech meaning no \_ they become linguistic . As a result one semaly lexeme , suddenly more than semaly to lexemes turning around goes \_

Lexeme many p meaningful if , each in the semester different concept reflection reached , in sememas different symbols each available \_ don't see speech in reality surrounded by to himself special , each sema based on connected units paradigm differently will be

Any \_ lexeme , whether it is one samemali , hoh many p semaly let it be , in the speech one meaningful will be The word while always one meaningful .

Polysemantic of words meaning only in the text is known . Polysemy two different road \_ with harvest will be :

1. The word is new meaning occupation reach as a result ;
2. Multiple meanings \_ from the word or a lot meaningful addition by means of made from words .

Of these the first one main road \_ is polysemantic \_ words how much to the meaning have be it \_ words meaning mutually connected will be Same that's it feature them from my homonyms differentiates \_ Polysemantic words \_ between relationship If it breaks , homonyms to the body will come . Nature and in society changes , appearance \_ happening new things own the term requires to be . Of this for in the language new of things name as new words \_ appear will be or in the language there is has been word new of the event to the term becomes \_

Many p meaningful words some only in meanings to phonovariant have to be can \_ Some many p meaningful words his own phonovariants with in its (original) meaning equal to application can \_ Lexicon meaning usually one thing , move name another one thing - item , sign , action to move the way with develops . Such move \_ the nature , position of each of the tongue in itself semantic laws determines \_

Meaning move out the following types available : metaphor , metonymy ,  
synecdoche , sarcasm , irony .

Lexicon meaning usually one object , sign of action name another one object , symbol , action to move the way with is determined . Such move \_ the nature , position of each of the tongue in itself semantic laws determines \_

We are this in our study a metaphor method through meaning migration about information scientific of our work object as Isaac Khan Example ghazals choose received \_

A metaphor high level accuracy , pleasantness and sloppiness charm have , from him appropriate use speech decorates \_ A metaphor just artistic tool not but \_ a person of mind , figurative of thinking important mechanisms is one

R. Q'ngurov " Uzbek of the language descriptive tools " in the book wrote : " Metaphor \_ hidden simile to say can \_ But it is simple from comparison difference does \_ If simple there is always a comparison main two from the member organize finds ( ie what comparison what is done with comparison comparison is made to be done and comparison to be done object ), in metaphor only second member - likened thing remains , like thing is dropped , but it is out of context felt stands , therefore, in a metaphor being described this is the subject second a member through perception will be done .

Someone object , symbol , action name to another mutually \_ external ( shape , color such as aspects with ) similarity based on if moved metaphor ( Greek metaphor -“ move ”) way with transfer is called

A metaphor way \_ with of moving main Appearances :

1. One subject name another one to the subject shaped similarity \_ based on will be moved ;
2. To one subject ( sometimes action ) characteristic of the sign name another one in the subject to the mark will rot ;
3. To one subject special of action name another one of the subject to the movement it will rot . Also , metaphor - like , as if words also produced through to be done can \_

A metaphor event , mainly noun \_ category within , partially in the verb occurs . A metaphor derivative meaning harvest of doing wide spread out method as artistic style , speech the most important from the tool is considered

Metaphorical derivative meaning in speech very a lot occurs . But theirs Linguistically - semema what has become relatively less \_

Summary instead of that's it to emphasize It should be a metaphor in linguistics and studied in literary studies event is counted . In particular , in works expressible image portable in a sense interpretation to be done means \_ Emphasizing that \_ tooth \_ It is necessary to use a metaphor one how many types they exist \_ about above information given \_ A metaphor similar , therefore \_ many for \_ approaches form and methodical , to the task according to near if it comes , the essence in terms of differs . That 's why portable in a sense applied word in the style of interpretation will be done . Another one information , metaphor classic as " metaphor" in literature is called
