

CONTEMPORARY MORAL PROBLEMS

Ganiyev Ahror

a teacher of the Social and Humanities Department of Fergana State University

Abstract: Today's youth have completely lost personal characteristics such as patriotism and spirituality. They are for dirt is to freedom interrupt giving thing, him restriction . Mostly people of others consequences about without thinking, own goals to try to achieve ready.

Some people believe that morality is only for entering heaven after death, during life it does not affect the success of a person and does not bring any benefit. In fact, such an opinion is wrong. Morality is necessary in our life not only for the formation of a unique personality, but also for the development of society as a whole. Thus, the quality of human life is directly related to morality. Only moral principles respect to be done only in society people happy to be can _

Usually very a lot cases modern people enjoy , free life and entertainment moral of values superior they put With that together , they morality absolutely they forget , only their own selfish needs with managed .

Today's Time young people patriotism and spirituality such as personal features Entirely lost _ They are for dirt is _ to freedom interrupt giving thing , him restriction . Mostly people _ of others consequences about without thinking , own goals to try to achieve ready _

National our culture each always to threats meeting came _ until the 20th century hegemony wanted invader of forces against meeting came if so , now ideological weapon primary In our global age, the region is chosen series problems threat is putting These are the problems cultural boundaries broken , national to units sometimes openly , sometimes while hidden respectively his own negative effect is showing . « Public culture » nation and people does not choose To this end a lot nationality Uzbekistan people his each how to the forms road the only national without giving ideology around merger to the goal is appropriate .

Technician development , his in society place and role stop , denial reach possible it's not . So It is man- made in civilization a person man-made culture -science practice , technology brand new forms , them use to know study and skill have to be requirement will be done . The same at the time a person of spirituality substance , creative strength power and own in place each one a person creative of power vision has been in labor of technique place and importance increased going to everyone known .

Technique development a lot yearly history our technical our knowledge , inventiveness , construction [our ability is science](#) , human needs , living environment development according to constant becoming perfect to go is showing . " Human and car » relationships more and more new content occupation reached is going But every how developed technology is also social issues without a person ca n't solve it . Country development fate technical knowledge , present of the time complicated technologies take over with together spiritual in terms of mature , perfect people solution does _

Concept of " Bioethics ". of a person whole to the living attitude seeing coming out issues field mean holds _ Biology and medicine in the field of knowledge development , medicine new your possibilities development traditional ethics before face didn't come problems cause

released . In practice bioethics practical to ethics turned yes main attention practical of medicine moral problems turned _ Today's in the day modern of bioethics with euthanasia , cloning , abortion depends problems there is . Creativity and creativity virtue Allah created all creatures inside the most it's awesome calculated to a person more given _ Sometimes while virtue place to himself depends without vandalism vice take over takes _ This is the case individual from the level a person level forming mother in the womb to the child relatively the woman to himself depends and depends didn't happen cases of the fetus development artificial road with with termination (abortion). depends circumstances medical moral problem as today's in the day too many _ meeting stands _ For example , " in Europe three country North Ireland , Malta and Ireland Abortion is prohibited in the Republic . Statistics to information according to abortions the number births from number less it's not . Some countries while note done abortions the number of births a lot in Russia some of the number of abortions in maternity hospitals sharp increase because of to the priest help asking appeal they did Even doctors to women from surgery before monk with to talk a must by doing are putting That's why under the influence of from abortion give up those who passed away the number increased is emphasized .

Bioethics studies field , social discussions and moral decisions acceptance to do area as in our country his own initial steps is throwing of the world many famous thinkers humanity new thousand annually living stay for destructive traditions and from divorce new universal to the worldview road to find necessity is showing . Theirs this views International Humanitarianism Academy released in 2000 by humanity in the manifesto reflection was made . In it the following words have : « New outlook a person rights protection to do , of a person freedom and value more increase , as well as our whole humanity in front of our obligations note reach should " .

The world community has the following main ethical problems.

Various different cultural and moral of systems existence

Usually cultural relativism The problem is called moral principles one from culture to another how difference to do remind passes . There is main moral from problems one is that every one culture for moral was _ a single definition of things there is it's not . Some one societies one how many to the gods to worship inclined that it was like , some in societies while polygamy is honored and some in the regions animals considered sacred , West _ beliefs the world perception of reaching another point of view according to have _
