

MODERN INTERACTIVE LESSON AND ITS REQUIREMENTS

Z. Kholmatova

Associate professor of the Department of Social and Humanities, External Department of FSU

Abdullazizova R.

Independent researcher of FSU

Abstract: In this thesis, the construction of new schools, the reconstruction of thousands of schools, and the current repair work are being carried out at a rapid pace by our state. The classification of works aimed at increasing the creativity of the teacher who directly conducts theoretical and practical training, providing deep and thorough knowledge, and achieving high-quality mastering, is highlighted.

Key words: Modernization, efficiency, equipment, new generation of textbooks.

The implementation of the Law on Education, the National Program for Personnel Training, the "State National Program for the Development of School Education" in the educational process, and the achievement of quality and efficiency in education, and thereby the full implementation of modernized educational standards. the riding period has begun.

Construction of new schools, reconstruction of thousands of schools, current repair works are being carried out at a rapid pace by our state.

Providing schools with new equipment, tools, improved programs, modernized, tested standards, a new generation of textbooks (on lease), computerization is being implemented consistently on the basis of the state nationwide program.

Now is the time to organize the educational process based on the updated program and modern lessons that meet the standard requirements.

In other words, to teachers who take a responsible approach to the organization of lessons instead of boring lessons, have professional knowledge, methodical skills, are responsible, have perfectly mastered modern, interactive pedagogical technology, and are able to organize education based on innovations. demand is increasing. No matter how much the material base, standards, curricula, programs and textbooks are improved in education, achieving the expected main result, imparting deep and thorough knowledge, and achieving high-quality mastery is the creativity of the teacher who conducts theoretical and practical training. research, qualification, and pedagogic skills, and it requires the student to stay in the educational center.

The 1st President of the Republic of Uzbekistan gives a clear definition of the concept of a perfect person in the work "Without historical memory - no future". "A perfect person means, first of all, people who have a high consciousness, who can think independently, who can be an example to others with their behavior, who are educated and enlightened." The educational system and the school were set as a goal, i.e. to raise a perfect person and bring him to adulthood.

Any education should be based on the personality of the student, his interest, desire, and need. That is, it is required to focus on individualization of education. Now what is the individualization of education? Let's answer the question:

-individualization of the educational process is a teaching method that takes into account the fact that each student actively participates in the educational process and makes a personal contribution to the learning process;

- when organizing the educational process, the methodical approach of the teacher, speed, personal characteristics of the student are taken into account;

- in conducting educational methodical, psychological, pedagogical organizational management work, the personality of the student is at the center of learning and knowledge.

So, the quality and effectiveness of education is related to the student's effective independent reading, independent thinking and thinking activities aimed at mastering the educational content. The student is not taught, he is taught to read, learn and work independently.

In this, teachers are taught to learn through independent analysis, to think creatively, to think freely based on personal conclusions. The ability to think against thoughts alien to us, to defend one's position is formed.
